

The Election Integrity Partnership (EIP)'s entire purpose was to censor all speech and thought contradicting official state and federal government narratives. Based on EIP's own report, it appears state and federal entities and officials sent dozens of requests to EIP to censor Gateway Pundit's speech across all major social media platforms. EIP not only facilitated the censorship of speech, but it worked aggressively to ensure governmental propaganda's primacy across all major forms of communication.

"How is this any different from what happens in Communist Party-controlled China?" said Gateway Pundit Publisher Jim Hoft. "The government, through its EIP henchmen suppressed our speech because it ran counter to the government's preferred narratives. With the EIP operating as a government-deputized censor, how can freedom of thought survive? How can freedom itself survive? The scary thing is, the EIP is only a single office within the greater government-wide Ministry of Truth."

"Gateway Pundit's First Amendment Rights were violated by - literally - a fascist, public-private partnership," said Gateway Pundit attorney John Burns. "EIP's own report explicitly states that its whole purpose is to assist state and federal agencies in circumventing the First Amendment - to enable the government to censor speech and yet attempt to keep its hands clean. However, this appears to be a very simple nexus or entwinement case, with deep Supreme Court precedent. Gateway Pundit is reviewing its legal options."
