Jeremy,

Understood. Thank you. After the election we should discuss how we can help support the Special Situations Table to reduce this site worker error.

Hi Gabriella,

We do not have the authority to make a determination about what ballot to accept. We will process any provisionals received and accepted based on that ballot, but we will not duplicate onto a different ballot or make a determination about what ballot a voter should have voted.

Thank you,

Jeremy

I'm checking with the Secretary of State on our options. Monday we'll work on finding out how many we're dealing with.

Thanks,

-GCK

Gabriella, it is not my decision how you proceed. I do not know what the statute states about duplicating provisionals.

Constance,

As we've begun processing the Provisional Ballots we're seeing operator errors that we need to make a decision on how to handle. We're seeing that Poll Workers issued ballots for a voter's previous address, instead of their new address, which puts them in the wrong precinct. This is not the voter's error, but it would make their vote ineligible.

This was an issue in the Primary Election as well and we decided to submit them as "Duplication Required" and the races they were eligible to vote in were accepted.

Are we okay to move forward with this process on our end, or are we wholly discarding ballots based on Poll Worker Error?

Please let me know how you'd like us to proceed. We sent our ballot processors home for the weekend and this changes the programming, so we needed time to make adjustments. We don't yet know how many Provisional Ballots fall under this issue, we'll have a better sense of that once we go through more. We have seen a few sites where they did everything correctly and we've been able to accept those.

We will be providing our Provisional Ballot Team with instructions at 8am on Monday. Please let us know so that we can give our team the correct training.

Thank you,

-Gabriella
