Mr. Jeff Zients  
Assistant to the President and Chief of Staff  
The White House  
Washington, DC 20500

Dear Mr. Zients:

The Committee on the Judiciary is continuing its oversight of the Biden Justice Department's commitment to impartial justice and its handling of a special counsel investigation against President Biden's chief opponent in the upcoming presidential election. According to recent reporting, Jay Bratt—a Department of Justice employee and top aide to Special Counsel Jack Smith—met with White House officials multiple times, just weeks before Mr. Smith indicted former President Donald Trump.<sup>1</sup> This new information raises serious concerns regarding the potential for a coordinated effort between the Department and the White House to investigate and prosecute President Biden's political opponents.

In September 2021, Mr. Bratt reportedly met with an advisor to the White House Chief of Staff.<sup>2</sup> Two months later, in November 2021, Mr. Bratt again went to the White House to meet with Administration officials.<sup>3</sup> During this same period, President Trump's lawyers were negotiating with the National Archives about presidential records from his tenure in office.<sup>4</sup> According to reporting, Mr. Bratt's 2021 White House meetings related to "national security."<sup>5</sup> Subsequently, on March 31, 2023, just nine weeks prior to Mr. Smith's indictment of President Trump, Mr. Bratt met with the White House Counsel's Office Deputy Chief of Staff Caroline Saba and FBI Special Agent Danielle Ray for a "case-related interview."<sup>6</sup>

We have previously raised concerns about Mr. Bratt's involvement in this matter, which you have declined to address to date.<sup>7</sup> Mr. Bratt is alleged to have improperly pressured a lawyer representing an employee of President Trump to induce the lawyer's client to cooperate with the Department's prosecution.<sup>8</sup> Mr. Bratt allegedly commented to the lawyer that he did not think the lawyer was a "Trump guy" and that "he would do the right thing."<sup>9</sup> Mr. Bratt referenced the lawyer's application for a judgeship on the D.C. Superior Court and implied that the application would be received more favorably if his client cooperated with the prosecution of President Trump.<sup>10</sup>

These facts reinforce the serious concern that Mr. Smith is not running an impartial and unprejudiced investigation and prosecution. The Committee has a significant interest in examining how the Department runs its Special Counsel investigations to inform potential legislative reforms concerning the Department's Special Counsel practices and operations. Accordingly, so that the Committee can fulfill its oversight obligations, please produce the following information:

1. All documents and communications referring or relating to any appointment, meeting, or other visit by Mr. Bratt to the White House or the Executive Office of the President; and
2. All documents and communications between the Executive Office of the President and the Department of Justice referring or relating to the investigation and/or prosecutions of Special Counsel Jack Smith.

Please provide this information as soon as possible but not later than 5:00 p.m. on September 12, 2023. Further, this letter serves as a formal request to preserve all existing and future records and materials related to Mr. Bratt's appointments, meetings, and visits to the White House or Executive Office of the President, and any documents or communications referring or relating to Mr. Bratt's White House visits. You should construe this preservation notice as an instruction to take all reasonable steps to prevent the destruction or alteration, whether intentionally or negligently, of all documents, communications, and other information, including electronic information and metadata, that are or may be responsive to this congressional inquiry. This instruction includes all electronic messages sent using your official and personal accounts or devices, including records created using text messages, phone-based message applications, or encryption software.
