Mayor,

As discussed, please find two key briefing documents for use with briefing Members of the Senate and/or House.

The first is the bullet point overview of the numbers of interest.

The second is a substantive analysis created for us for this briefing by Christos Makridis.

The third, which I think should be included as well, is Peter Navarro's excellent report - which most Members have probably not personally seen. He has a new report coming out shortly, which should be sent as soon as available as an addendum to this group of documents.

It would be helpful to get staff POCs so that we can send these to them electronically.

Please let me know your thoughts, and if you need anything further.

Very best,
Katherine
